

Learning Goal and Success Criteria

Learning Goals help students understand what they are expected to learn. Success Criteria break down what students need to demonstrate to achieve the Learning Goal.

Developing Learning Goals and Success Criteria helps to focus and guide student learning; **it is one of the first steps** in planning a unit. It can also be used as a basis for feedback.

Construction

Pre-Construction

- Consider the length of learning for the unit.
- Look at curriculum documents (including Ngarri curriculum documents, content descriptors and achievement standards) and planner with what students need to *understand, know and do*.
- Identify prior knowledge of students, including formative assessment, tuning in stage of inquiry, etc.
- Break down the learning into chunks that are sequenced and appropriate for the learners
- Identify tier 2 and tier 3 vocabulary.
- Anticipate common misconceptions or challenges related to the learning.

Process: Writing Learning Goals

Learning Goals are succinct and focus on the learning, rather than the task/activity (they do not need to change every session).

1. Begin the Learning Goal with 'We are learning...'
2. Add the key learning- what the students need to understand, know or do.
3. Include any appropriate tier 2 or tier 3 vocabulary.

Process: Writing Success Criteria

Success Criteria helps students understand the steps and quality indicators needed to meet the Learning Goal.

1. Start with the learning goal in mind.
2. Select **observable** verbs and measurable behaviour (when applicable) to break down the learning into three Success Criteria.
3. Consider how to scaffold the Success Criteria so that they build in complexity and are differentiated with the product and process.
4. Include an open-ended Success Criteria when applicable.

Learning Goal and Success Criteria

Display

- LG/SC are to be displayed in a prominent and highly visible location throughout the whole lesson.
- Ensure only the Learning Goal and Success Criteria for the current lesson are visible to reduce cognitive load and help students stay focused.

Unpacking

- Unpack with students at the start of Teach and Learn by underlining and annotating key vocabulary and verbs. Create shared definitions that are student friendly.
- Explicitly connect the LG/SC to prior knowledge and recent lessons to reinforce continuity and deepen understanding.
- While modelling (including worked examples/non-examples), articulate your thinking aloud and explicitly reference the LG and SC. Make visible links by pointing to the displayed LG/SC to show how success is being demonstrated.

Content	Learning Goal	Success Criteria	Suggestions to unpack
Sentence fluency (Year 3) Key Understandings <i>I understand:</i> - varying the start, structure and length of sentences enhances the reader's experience	We are learning to vary the start of sentences.	I can identify different types of sentence starters. I can experiment with different types of sentence starters to grab my reader's attention. I can revise my writing to begin with an exciting sentence starter.	Terminology: Vary Sentence Starter Experiment Type of sentence starters e.g Dialogue Onomatopoeia Alliteration Time openers Simile Description
Science Inquiry (Year 2) CD: scientific questions and predictions can be investigated safely by following procedures that have sequenced steps (VC2S2I02) AS: Students suggest steps to be followed in an investigation, and follow safe procedures to make and record observations, including informal measurements	We are learning to plan and conduct an investigation.	I can identify how to be safe. I can suggest sequenced steps. I can record my observations while following sequenced steps.	Terminology: conduct investigate safe sequence record observations Ways to record e.g. diagrams, labels, tables, sentences, five senses, protocols (see, think, wonder)
